# Primary Device Configuration

## Primary Device Configuration

### Understanding Primary Devices

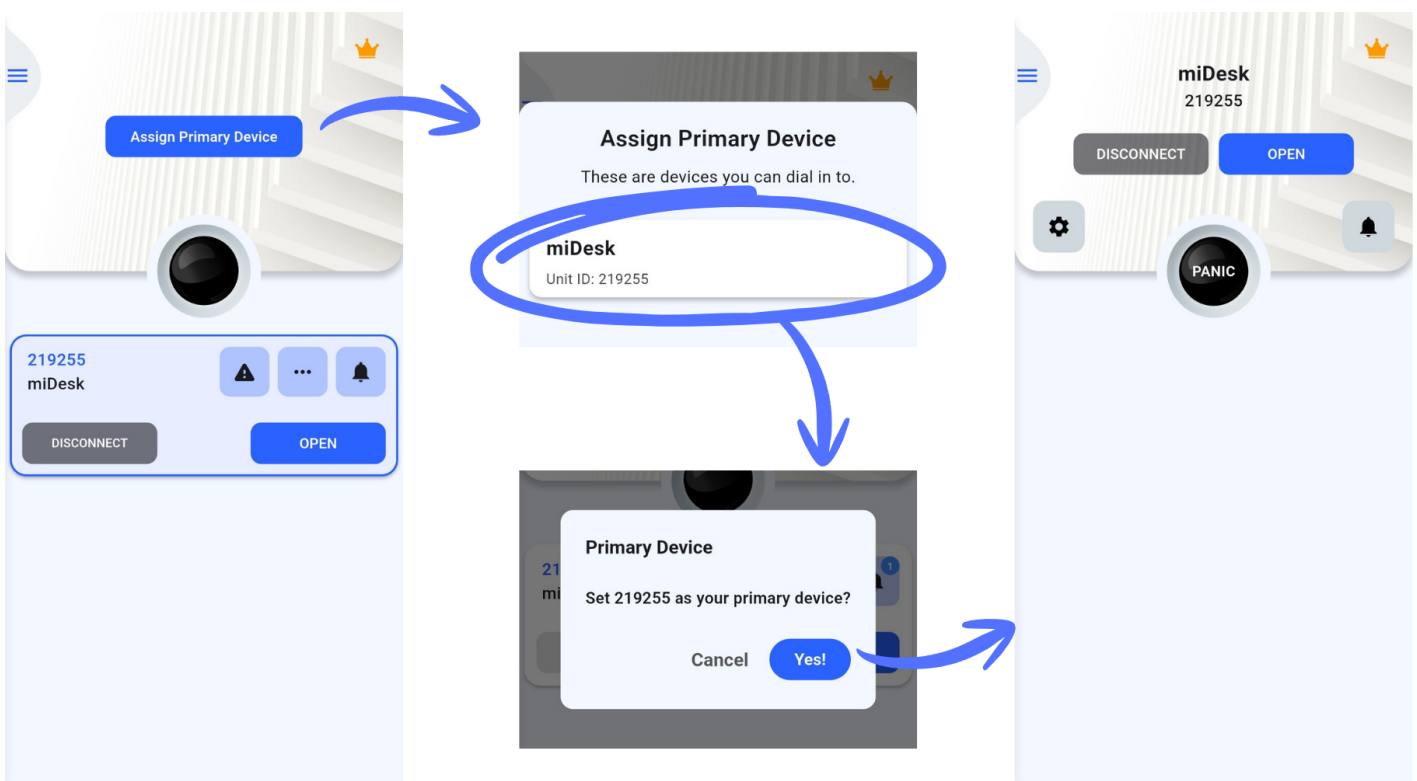

A primary device is your most frequently accessed alarm system, receiving:

- Priority connection allocation
- Prominent home screen placement
- Faster response times

### Setting Your Primary Device

#### Method 1: Home Screen Setup

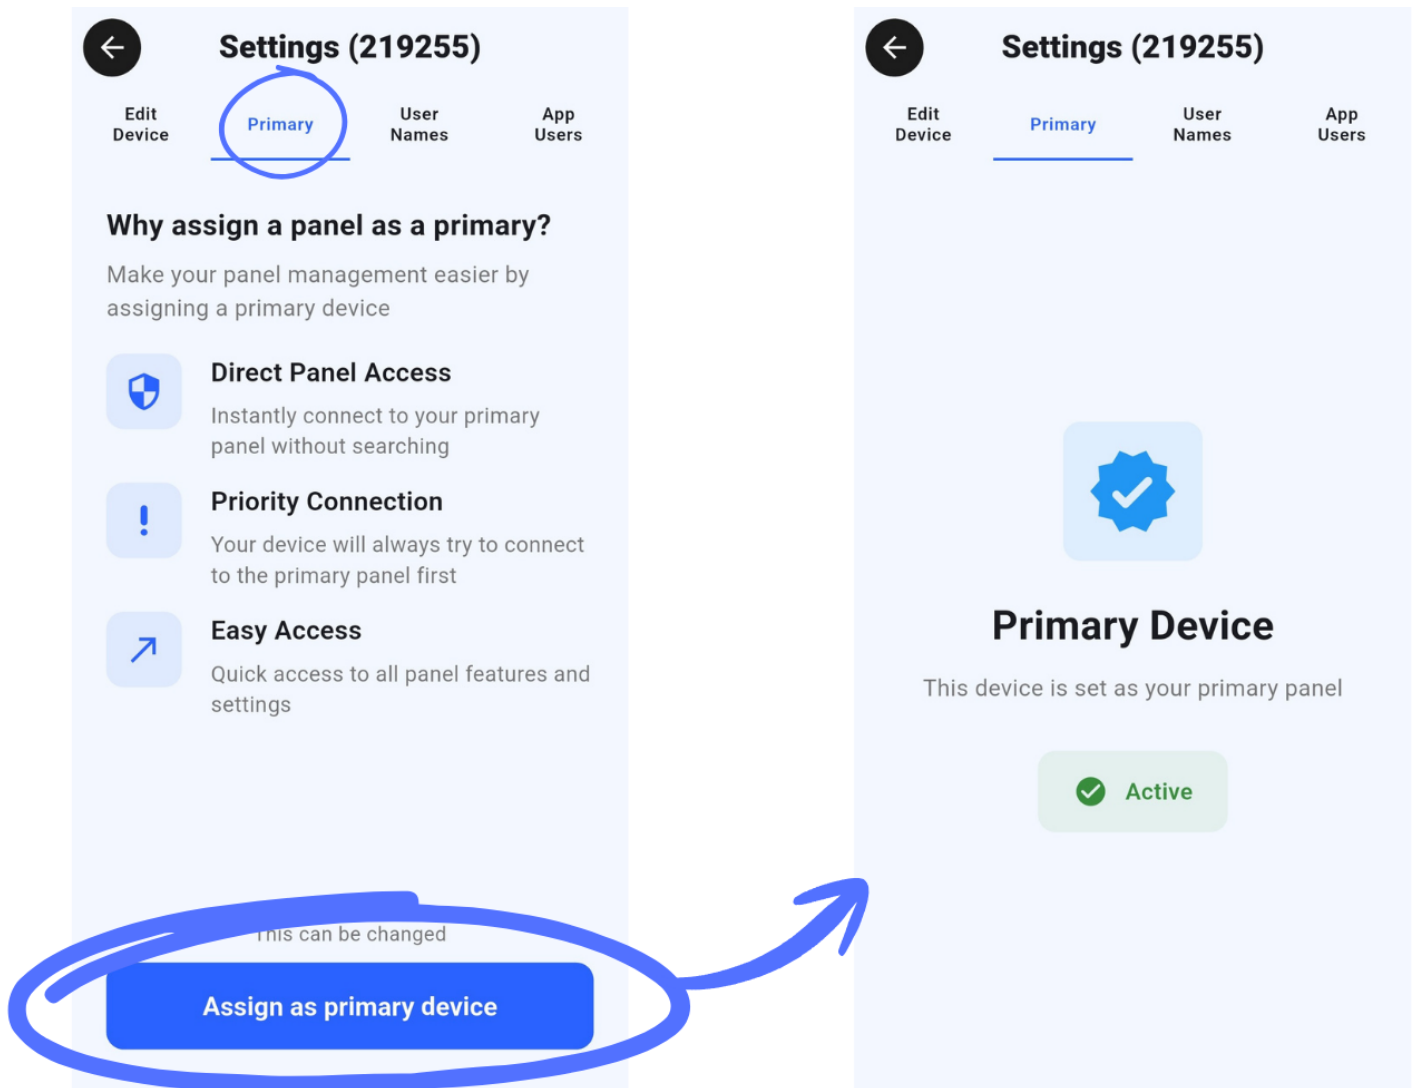

1. Tap "Assign Primary Device" on the main screen
2. Select your preferred device from the available list
3. Confirm your selection

#### Method 2: Device Settings

1. Open device settings
2. Navigate to the "Primary" tab

3. Enable "Set as primary device"
4. Confirm the change

## Managing Primary Status

- Only one device can be designated as primary
- Change primary designation at any time
- Remove primary status through device settings
- Visual indicators show current primary device

# Zone Management

## Zone Management

### Zone Status Indicators

| Color    | Status   | Meaning                   |
|----------|----------|---------------------------|
| ☐ Green  | Clear    | Zone secure, no activity  |
| ☐ Blue   | Bypassed | Zone disabled temporarily |
| ☐ Red    | Violated | Zone triggered/open       |
| ☐ Orange | Restored | Was violated, now clear   |

## Managing Zones

### View All Zones:

1. Tap grid icon
2. Heatmap shows all zones
3. Filter by status/area
4. Click for details

### Edit Zone Info:

1. Tap the Zones Grid Icon
2. Select relevant Zone number
3. Tap Edit Zone
4. Update:
  - Zone name
  - Triggered Text
  - Clear Text
5. Save changes

---

## ? Bypassing Zones {#bypass}

### What is Bypassing?

Temporarily disable specific zones while keeping others active.

### When to Bypass

- Faulty sensor
- Maintenance work
- Leaving window open
- Pet in secured area
- Temporary access needed

## How to Bypass

### Method 1: Zone List

1. Expand area card
2. Find zone to bypass
3. Toggle switch OFF
4. Zone turns blue

### Method 2: Heatmap

1. Switch to heatmap view
2. Tap zone tile
3. Select "Bypass"
4. Confirm action

### Method 3: Quick Swipe

1. In zone list
2. Swipe right on zone
3. Quick bypass toggle

## Managing Bypassed Zones

### View All Bypassed:

1. Heatmap view
2. Filter → "Bypassed"
3. Shows blue zones only

### Clear All Bypasses:

1. Disarm area
2. Re-arm without bypass
3. Or manually unbyypass each

### Bypass Notifications:

- Alert when zones bypassed
  - Status in notifications
-

# User Management

## User Management

### Understanding User Roles

The system supports multiple user types with varying permission levels:

- **Master Users:** Full administrative privileges
- **Standard Users:** Limited operational access

### User Administration (Master Users Only)

1. Access device settings
2. Select "User Names" tab
3. View all users with system access
4. Manage user permissions and access levels

### User Management Capabilities

Master users can:

- View complete user lists
- Remove standard user access
- Edit user display names

### User Code Management

- Each user has a unique 4-digit code
  - Codes link to specific user profiles
  - All actions are logged for security
  - Regular code updates recommended
-

# Notification Configuration

## Notification Configuration

### Comprehensive Alert Management

Customize your notification preferences to receive only the information you need, when you need it.

### System-Wide Notifications

1. Access sidebar menu
2. Select "Notifications"
3. View consolidated message center

### Device-Specific Settings

1. Open device settings
2. Navigate to "Push Notifications"
3. Enable or disable global notifications
4. Select specific alert types

### Available Alert Categories

- **24-Hour Monitoring:** Always-active zone alerts
- **Access Events:** Entry and exit notifications
- **Auto Test:** Automated test results
- **Burglary:** Intrusion detection warnings
- **Bypass Notifications:** Zone override alerts
- **Fire Alarms:** Fire detection system alerts
- **Patrol Updates:** Security patrol confirmations
- **Medical Alerts:** Emergency medical notifications
- **Open/Close:** Standard opening and closing notifications
- **Open/Close Monitor:** Advanced opening and closing notifications
- **Panic:** Panic button activations
- **Supervision:** Monitored device notifications
- **System Messages:** General operational and maintenance notifications

### Notification Best Practices

- Enable only essential notifications to avoid alert fatigue
- Test notification delivery monthly
- Ensure phone permissions are properly configured

- Consider quiet hours for non-emergency alerts
-

# Emergency Contact Management

## Emergency Contact Management

### Personal Emergency Contacts

Configure trusted contacts for emergency situations:

1. Add primary emergency contacts
2. Test contact functionality regularly

### Official Emergency Services

Customize official emergency numbers for your region:

- Police Services (SAPS)
- Fire Department
- Medical Emergency Services
- Armed Response Units

### Location Sharing Features

- GPS coordinate transmission
  - Manual sharing options available
-

# Advanced Configuration

## Advanced Configuration

### Device Synchronization

Keep your device configuration current:

1. Access device settings
2. System retrieves latest configuration
3. Updates include:
  - Area definitions
  - Zone configurations
  - Smart action settings
  - User permissions

### Operating Mode Selection

For compatible systems, switch between operational modes:

1. Navigate to Settings
2. Select "Mode" tile
3. Available options may include:
  - Standard Mode
  - Custom Panel Mode Configurations
4. Allow 2-3 minutes for mode changes to apply

### Security Enhancements

#### **Biometric Authentication**

- Enable fingerprint or facial recognition
- Provides quick, secure access
- Password fallback always available
- Recommended for all users

#### **Auto-Logout Protection**

- 30-second inactivity timeout
- Prevents unauthorized access
- Applies to sensitive screens

#### **Session Management**

- "Remember Me" option for trusted devices
  - Biometric re-authentication required
  - Secure token storage
- 

# Privacy and Permissions

## Required Permissions

The app requires specific permissions to function properly:

- **Location:** For emergency GPS sharing
- **Camera:** For QR code scanning
- **Notifications:** For alert delivery
- **Contacts:** For emergency contact integration

## Privacy Considerations

- All data transmissions are encrypted
  - Location data only shared during emergencies
  - No background location tracking
-

# Subscription Management

## Subscription Management

### Account Tiers

#### Free Account

- Connect up to 5 devices
- Access all core features
- No time restrictions

#### Pro Subscription

- Connect up to 10 devices
- Advanced feature access
- Early access to new features

#### Unlimited Subscription

- Connect an unlimited amount of devices
- Access to ALL features

## Subscription Options

- **Monthly Pro Plan:** R14.99 per month
- **Annual Pro Plan:** R149.99 per year (save 17%)
- **Monthly Unlimited Plan:** R149.99 per month
- **Annual Unlimited Plan:** R1499.99 per year (save 17%)

## Managing Your Subscription

#### To Purchase:

1. Tap the crown icon on home screen
2. Select your preferred plan
3. Choose payment method
4. Complete transaction through app store

#### To Manage Existing Subscription:

1. Navigate to sidebar menu
2. Select "Subscriptions"

3. Manage through your app store account
  4. Modify or cancel as needed
