5. Please double check the boxes and then click Register Now at the bottom of the page.

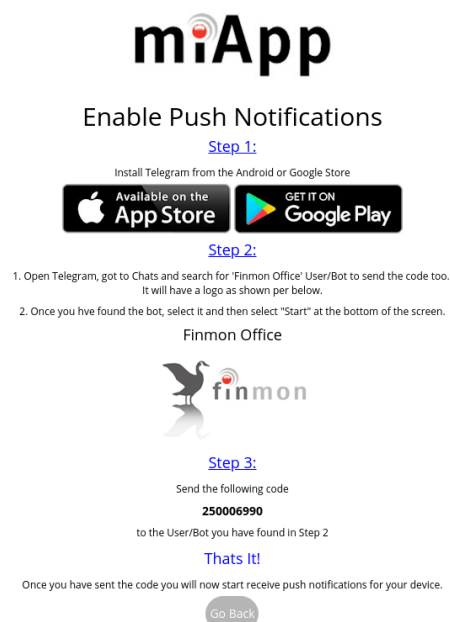

The registration form for miApp includes the following fields and options:

- Name:** Peter Jones
- Username:** peterjones (Note: Your username must have at least 8 characters or more)
- Email:** peter.jonesexample@gmail.com
- Password:** (masked with asterisks)
- Confirm Password:** (masked with asterisks)
- Unit ID or Serial Number of the device:** 109406
- Name your device:** Peter Jones Home
- Panel:** Panel (dropdown menu)
- Telegram Push Notifications:** Yes (selected) / No (radio button)
- Authentication Method:** Keypad (selected) / Telegram (radio button)
- 4 Digit code that must be setup prior on the alarm panel:** 1590

A red box highlights the **REGISTER NOW** button at the bottom.

6. The keypad should have all the Partitions and Home lights flashing green. Input \* Master \* to then authenticate the new user.
7. If the Registration was successful and you did select YES for push notifications, you will be taken to the Telegram set up page.

The Telegram setup page for miApp includes the following steps:

- Step 1:** Install Telegram from the Android or Google Store. (Buttons for App Store and Google Play are shown)
- Step 2:** Open Telegram, go to Chats and search for 'Finmon Office' User/Bot to send the code too. It will have a logo as shown per below.  
Once you have found the bot, select it and then select "Start" at the bottom of the screen.  
The Finmon Office logo is shown.
- Step 3:** Send the following code to the User/Bot you have found in Step 2:  
**250006990**  
Thats It!

Once you have sent the code you will now start receive push notifications for your device.

A **Go Back** button is at the bottom.

8. Follow the steps as below :-

### Enable Push Notifications

For Apple phones  
download here

Install Telegram from the Android or Google Store

For Andriod phones  
download here

**Step 1:**

1. Open Telegram, got to Chats and search for 'Finmon Office' User/Bot to send the code too.  
It will have a logo as shown per below.

2. Once you hve found the bot, select it and then select "Start" at the bottom of the screen.

Your Alarm  
Companies logo  
should appear here.

**Step 3:**

Send the following code

250006990

Copy this code for you to  
paste into the Telegram bot

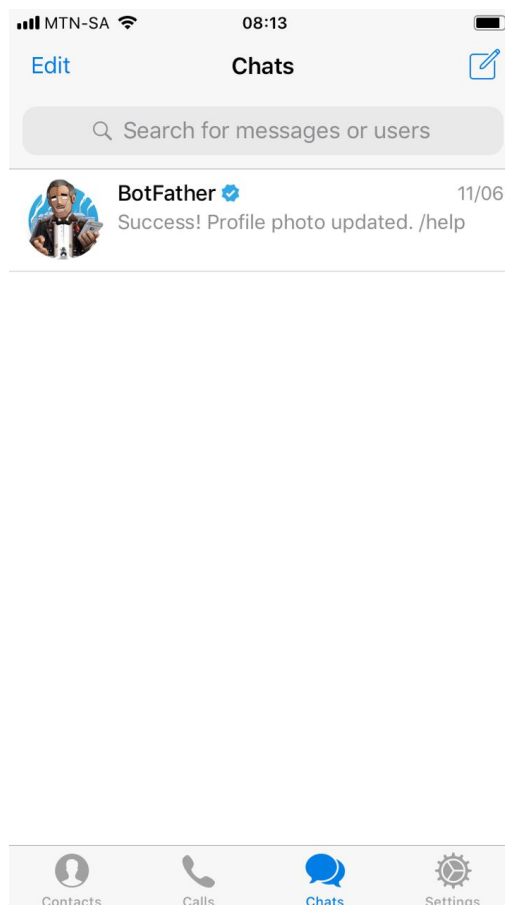

to the User/Bot you have found in Step 2

**Thats It!**

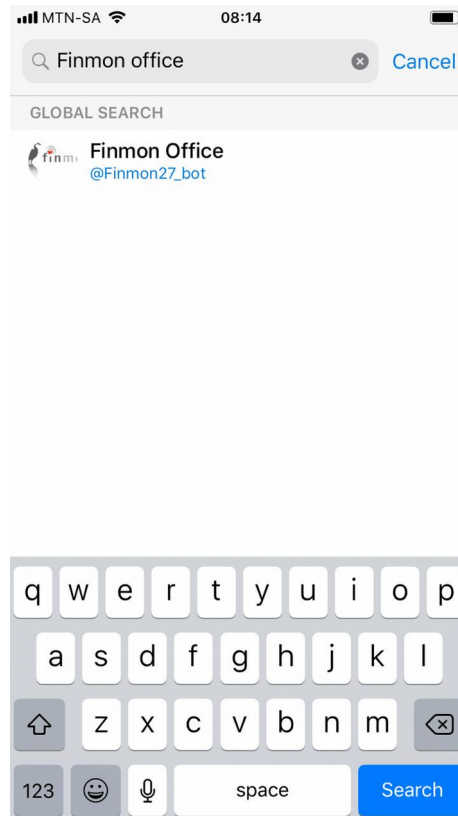

Once you have sent the code you will now start receive push notifications for your device.

Go Back

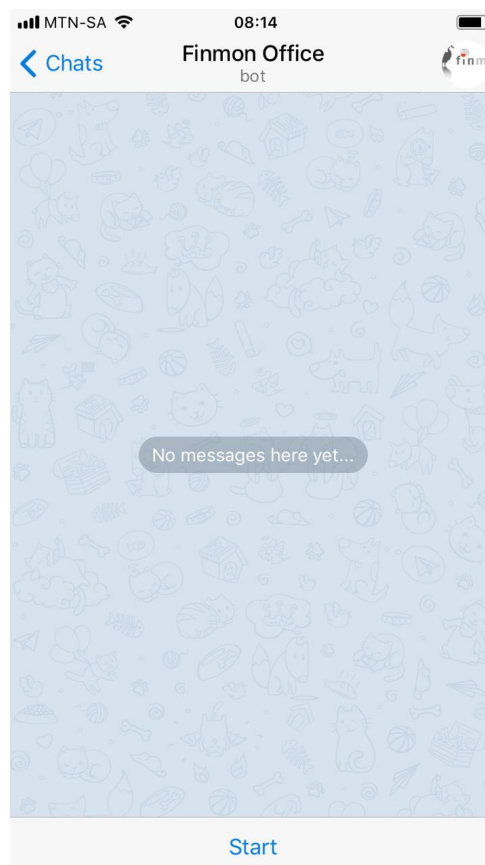

9. Now once telegram has been downloaded and installed. Open the Telegram and search in the chats tab.

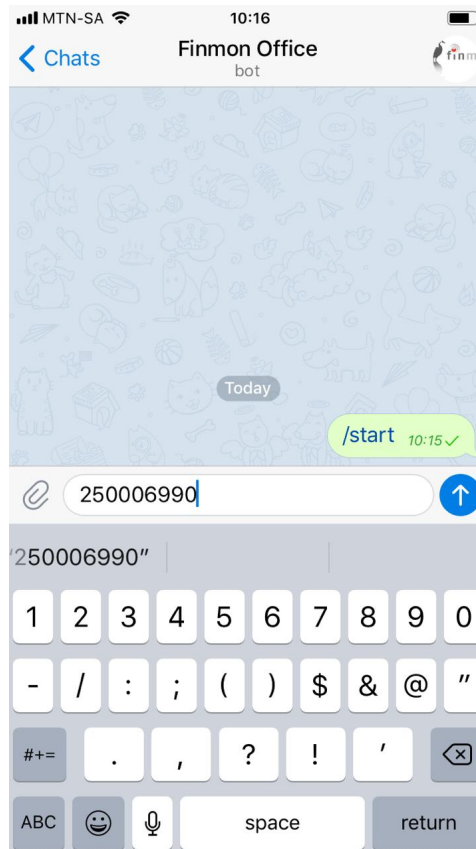

10. Search for your Alarm Company.

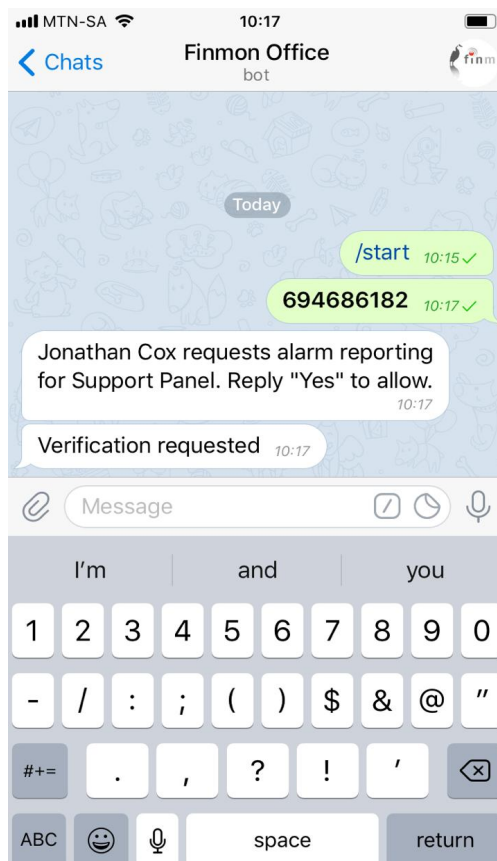

11. Open the Chat and click Start

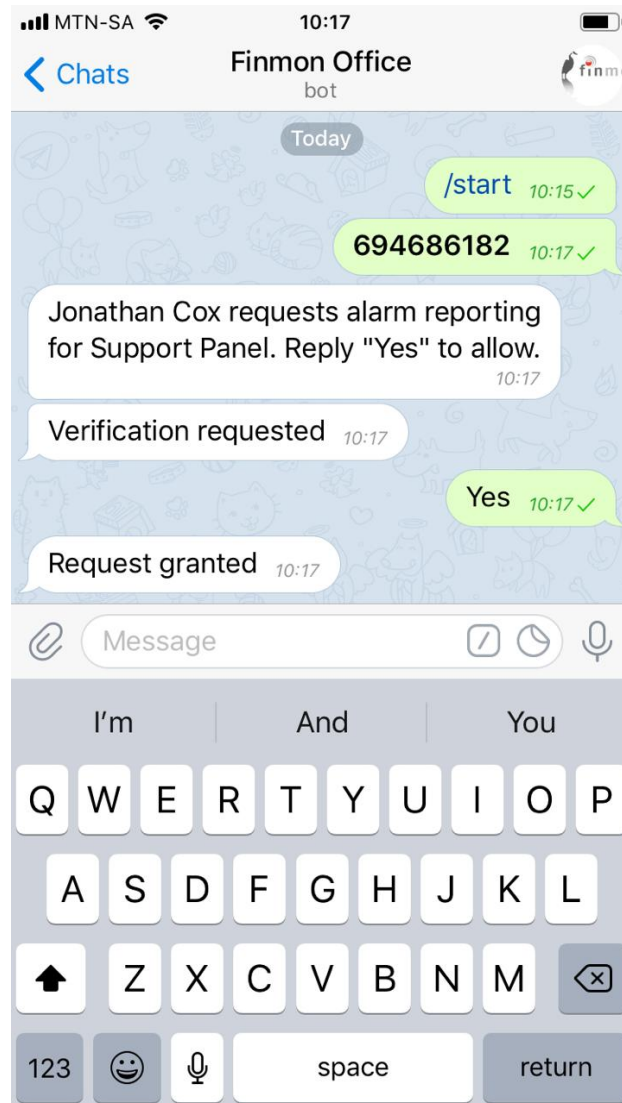

12. Send the code you copied earlier.

13. On the Admins Telegram reply Yes. (The admin would be the first registered person, If no person is registered before you will become the Admin User.)

14. This completes the Registration.

## Registering a New User Panel via Telegram

You will have to have registered atleast 1 user on Telegram already having used the Keypad. Only once there is already an Admin user on the telegram app to accept them. Only once you have registered atleast 1 person on Telegram through the Keypad will you be able to use this method of using Telegram.
